

Declaration of Compliance for articles intended for food contact

Watson-Marlow declares that Pumpsil platinum-cured silicone tubing complies with the legal regulations laid down in the Regulation (EC) No. 1935/2004. This includes manufacture according to GMP principles, traceability and meeting organoleptic requirements.

Pumpsil also complies with the German BfR (Bundesinstitut für Risikobewertung – Federal Institute for Risk Assessment) recommendation XV on silicone for food contact. When used as specified, the overall migration does not exceed the legal limits. Pumpsil also passes tests for volatile organics content and residual peroxide or platinum content.

The materials and raw materials used in the manufacture of Pumpsil comply with the list of permitted ingredients in German BfR XV.

Specification of the intended use or restrictions:

- Types of food intended to come into contact with the material:
 - Aqueous foods
 - Acidic foods
 - Foods with a hydrophilic character or with a low alcohol content
- Food contact with the material should not exceed 24 hours at 40C

This declaration is valid for the product delivered and its use as specified above. The verification of compliance was performed based on the above rules; according to which the product complies with the legal requirements subject to adherence to the stated conditions for contact with food. In case of deviations from the intended use, the user is responsible for verifying compliance and suitability.
